

Installation

The installation is done through an assisted setup. The installation is described in the following chapter

	<p>The first window welcomes the User and informs that the setup has been started. Using the button next the user will be redirected to the next installation page</p>
	<p>The first window welcomes the User and informs that the setup has been started. Using the button next the user will be redirected to the next installation page</p> <p>After all settings are made, of if the default should be taken as it is, the user can continue with the button "Next"</p>

Edit - MDE Setup

Manage [Session List](#) [Import Miniforms](#) [Export Miniforms](#) ...

Allgemein

Enable Log

[Close](#)

On the first link (MDE Setup) the user can enable or disable the log. Default = log is enabled

The MDE Setup is also described in chapter 7

Edit - MDE Users

Search + New [Edit List](#) [Delete](#)

Name ↑	Password	Assigned User ID	Location Code	Main Menu Miniform
→ 888			MAIN-MGR
999			MAIN-MGR

On the second link (MDE Users) the user can add new users for the mobile handheld application.

The default user name=999 password=999 is created.

The MDE User Settings are also described in chapter 8

Edit - MDE Device

Search + New [Edit List](#) [Delete](#)

Device ID ↑	Device Name	Device Type	Assigned User ID	Location Code	Start Miniform	Debug
1	320x320	320X320			LOGIN	<input checked="" type="checkbox"/>
2	480x480	480X480			LOGIN	<input type="checkbox"/>
3	Fullscreen	FULL			LOGIN	<input type="checkbox"/>
→ 4	User Scenario	480X480				<input type="checkbox"/>
5	Test	1080X960			LOGIN	<input type="checkbox"/>

On the third link (MDE Device) the user can add new Devices for the mobile handheld application. There are already default entries available.

The MDE Device Setting is also described in chapter 4

Aproda Mobile Data Collection Setup Wizard

Aproda Mobile Data Collection Setup Wizard finished

All Done!

Initialize RoleCenter-Profile

[Back](#) [Next](#) [Finish](#)

On the last step of the Setup the user can choose if the Role Center Profile should be initialized. Default is set to active.

After clicking on "Finish" the setup is finished.
